

BURNER

FIRESTARTER

BURNER fire starters are the safest way to light up a fireplace, wood stove, or bonfire. These odorless packets are classified as non hazardous and non poisonous, and come in a practical storage barrel.

Take a few with you when you head to the woods. They just might make your day.

Advantages

Product is completely odorless.

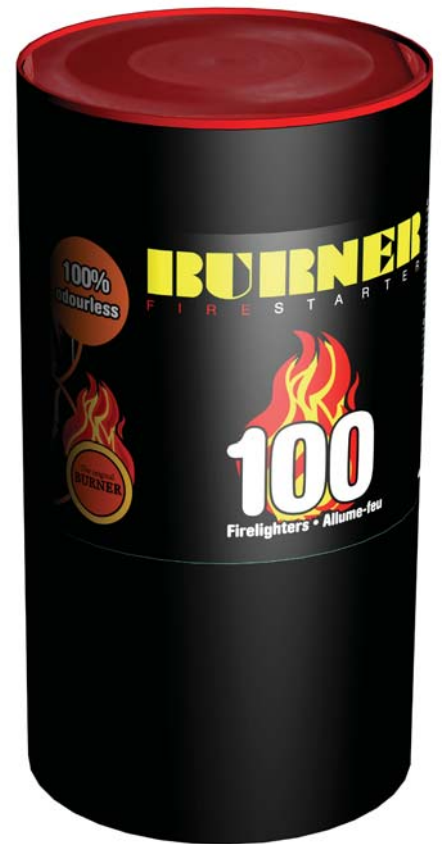

Low controlled flame that burns a long time.

Packets have a large surface area, which increases the amount of heat and prevents the fire starter from being smothered in the ashes.

Packets will light even if they have been exposed to humidity and water.

No "flammable" warnings are required on the packaging.

Safe and easy to use and will not self-ignite.

100 packets/barrel

Six barrel counter display
